1. Organize Photos

Click the *Organize Photos* tab in [Photo DVD Burner](http://www.photodvdburner.com/) to create one or more albums, select the birthday honoree's photos from a folder in your computer hard drive and add them to the album.

In the sub-tab of *Album Photo*, you can add or remove photos, rotate photos, set album thumbnail, arrange the order of the photos, etc. **Note:** Double-click one single photo in the album and you will be able to personalize the photos (transition, Pan & Zoom, Text, ArtClips, Subtitle, Brightness / Contrast, etc) one by one in the Photo Configuration window.

Switch to the *Transition & Music* tab, and you can set background music (your favorite Happy Birthday songs), apply transition effect, specify transition duration, photo duration, randomize photo transitions, etc.

In the *Album Theme* tab, there are lots of album themes available for you to choose from. You may also add separate images to the beginning and end of the album, and edit album beginning title and ending title, such as text, effect, duration, background color, etc.

Also you are allowed to preview the whole album before the conversion by clicking the *Album Preview* button.

2. Choose Menus

Click the *Choose Menus* tab in the interface of [Photo DVD Slideshow Software](#) to choose a menu template for the birthday slideshow. You can also specify the background music and background image, set font style, size, color, etc to customize the menu template.

Note: If all the menu templates cannot fit your needs, you may go to <http://www.socusoft.com/more-dvd-menu-template.php> to download more and find one that matches birthday best.

3. Burn Disc

Click the *Burn Disc* tab at the top menu to go to the conversion window. Then click the Output Format drop-down menu and choose the output format for the birthday

slideshow. You can choose to burn birthday photo slideshows to DVD/Blu-ray discs or create birthday photo slideshows movie. The following formats are available for you to choose from:
