How to Make Photo Slideshow for iPod touch?

Note: The following method works on PC. After the slideshow video is generated, you need to import it into iTunes library and then sync it to your iPod touch. If you want to create photo slideshows on your iPod touch directly, please download our iOS app **Photo Slideshow Director** from the iTunes app store.

If you want to create a photo slideshow for playback on your iPod touch 4, Photo DVD Burner can help you out! With this photo DVD maker, you can easily convert photos to iPod video, convert pictures to iPod video and make a photo video slideshow for viewing on iPod touch 4. To get started, download Photo DVD Burner, install and run the program. Then follow the steps below:

http://www.photodvdburner.com/photo-dvd-burner.exe
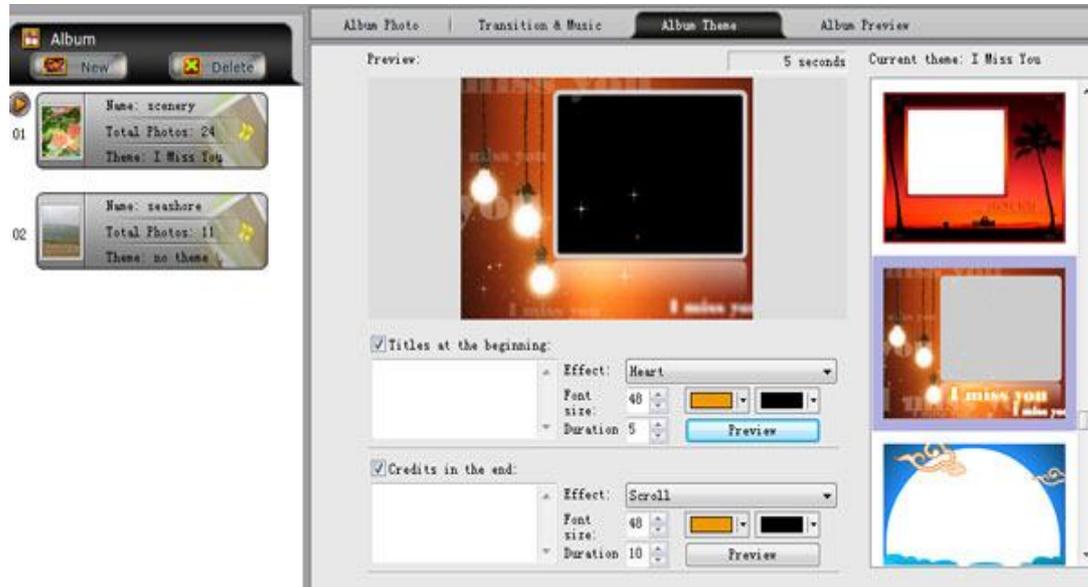

1.Organize Photos

Click the *Organize Photos* tab in Photo DVD Burner to create one or more albums, select photos from a folder in your computer hard drive and add them to the album.

In the sub-tab of *Album Photo*, you can add or remove photos, rotate photos, set album thumbnail, arrange the order of the photos, etc. **Note:** Double-click one single photo in the album and you will be able to personalize the photos (transition, Pan & Zoom, Text, ArtClips, Subtitle, Brightness / Contrast, etc) one by one in the Photo Configuration window.

Switch to the *Transition & Music* tab, and you can set background music, specify transition effect/duration, photo duration, randomize photo transitions, etc.

In the *Album Theme* tab, there are lots of album themes available for you to choose from. You may also add separate photos to the beginning and end of the album, and edit album beginning title and ending title, such as text, effect, duration, background color, etc.

Also you are allowed to preview the whole album before the conversion by clicking the *Album Preview* button.

2.Choose Output Format

Click the *Burn Disc* tab at the top menu to go to the conversion window. Then click the Output Format drop-down menu and choose **iPod MPEG-4 Movie** for the slideshow. And in the Parameters Setting area, you can specify output directory, profile (iPod Touch MPEG-4 Movie), and video/audio parameters such as video bitrate, size, codec, frame rate and audio codec, bitrate, sample rate, channel.

3.Create iPod Touch MPEG-4 Movie (*.mp4)

After you set the above parameters, you click the *Create Now!* button and start **creating photo slideshow for iPod touch**.
